ABOUT OUR INSTITUTION

Since ancient years, Indian women were kept submerged in all the aspects, both inside and outside of their residence. As years passed, there comes freedom in ascending powers to women in many aspects such as education, work, house and so. Nowadays, women are empowered in many challenging task.

But, this is the case of urban areas only. But at the same time rural women are found downtrodden in all these aspects. The prime aim is to bring rural women, out of these difficulties through education.

This context paved way for inception of Sri Bharathi Engineering College for Women, the first college started only for women in Pudukkottai, is named after the famous poet and freedom fighter, Bharathiyar, as he fought for women freedom. This college is started in rural area by Sri Bharathi Educational Trust, in the year 2009, mainly to inculcate quality education for rural women. It is located at about 6 Km from Pudukkottai on the Pudukkottai-Aranthangi Road, near Kaikkuruchi. This college is approved by AICTE, New Delhi and affiliated to Anna University, Chennai.

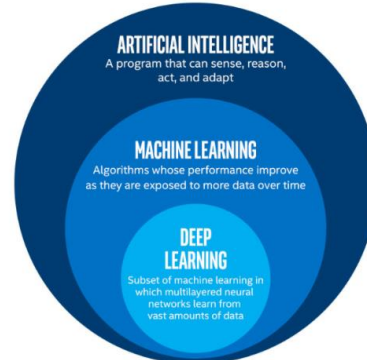

ABOUT OUR DEPARTMENT

The Department of CSE and ECE offers B.E Degree Programmes in CSE and ECE. The departments were started during the academic year 2009 with approval of AICTE and affiliation from Anna University Chennai to formulate proficient professionals to become part of the engineering and research association at the world

The Departments have experienced faculty members with different specialization in CSE & ECE. The sincere effort of our faculty to motivate the students has produced remarkable achievements in co curricular and extracurricular activities. Students are trained both quantitatively and qualitatively during lab sessions that enhance their understanding and help further to motive them to taking projects.

ABOUT THE WORKSHOP

Deep Learning is a subset of Machine Learning, which on the other hand is a subset of Artificial Intelligence. Artificial Intelligence is a general term that refers to techniques that enable computers to mimic human behavior. Machine Learning represents a set of algorithms trained on data that make all of this possible.

Server-side scripting is a technique used in Web

Development which involves employing scripts on a web server which produce a response customized for each user's request to the website. The alternative is for the web server itself to deliver a static web page.

The objective of the workshop is to understand the process and technologies used in Deep Learning and server side programming.

RESOURCE PERSONS

1. Dr. T.Kanimozhi

Associate Professor, ECE
VelTech University,
Avadi,
Chennai.

2. Er.G.Ramkumar

Senior Software Engineer,
Accenture,
Chennai.

TOPICS TO BE COVERED

- *Deep Learning and its practical uses*
- *Server Side Website Programming*
